## EDUCATION

**Bachelor of Science (B.Sc.) in Computer Science** - 4.00 GPA

Expected Grad: April 2025

The University of British Columbia, Vancouver, BC

## EXPERIENCE

**Software Engineer Intern, Amazon**

May 2023 - Present

**Technologies:** Java

- Optimizing the Amazon Prime membership cancellation flow for over **200 million** Prime customers

**Amazon Future Engineer Intern, Amazon**

May 2022 - August 2022

**Technologies:** Bash, FreeMarker, Git, Manual Development Entry Testing

- Implemented customer-facing features (customer emails, webpage widgets) related to Pausing & Resuming for **millions** of worldwide Amazon Prime customers, helping to retain **tens of thousands** of customers annually
- Automated feature implementation across **14** countries using Bash scripts, reducing development time by **49%** and costs by **43%**
- Created and deployed **10 AWS CloudWatch** Metrics Widgets and **20** Alarms using an AWS **TypeScript** CDK to monitor Prime Membership Pause & Resume features

**Development Director, nwPlus UBC**

May 2023 - Present

**Technologies:** Next.js, React, Firebase (Firestore, Storage, Analytics, Hosting)

- Leading a team of **6** developers to build **3** hackathon websites and maintain internal tools (QR Check-in App, Hacker Application/Information Hub & associated CMS, component library)
- Establishing industry standards and best practices to improve codebase quality and maintainability of **3** new project initiatives using **Prettier**, **ESLint**, and **CI/CD** workflows
- Providing technical support to **8** subteams, resulting in streamlined processes and improved project outcomes

**Hackathon Logistics Director, nwPlus UBC**

April 2022 - April 2023

- Directed the successful execution of **HackCamp 2022**, Western Canada's largest beginner-friendly hackathon, with **~100** participants (**76%** first-time hackers), **26** project submissions, and a prize pool of over **\$1500**
- Implemented a structured delegation system among **3** coordinators, fostering efficient task management and seamless coordination during weekly team meetings

## PROJECTS

**Expawdition (Stormhacks 2023 - 1st Place)**

[Devpost](#) | [Github](#)

**Technologies:** Next.js, React, Firebase (Firestore), Express, Node

- Developed an AI trip planner using the **GPT-3.5-turbo** AI model, **Google Places API**, and **Google Routes API** to generate optimized itineraries that consider user destinations, budgets, travel time, and personal preferences
- Designed a user-friendly interface using the **Chakra UI** library and custom **Figma** illustrations
- Collaborated with a team of 4, including a Project Manager, a Designer, and 2 Developers, to transform a Figma prototype into a fully functional full-stack web application within 24 hours

**liftz Workout Tracker**

[Demo](#)

**Technologies:** Next.js, React, MongoDB, Express, Node

- Developed a comprehensive workout tracker web app, including pages for a workout library, visual plate calculator, automatic PR (personal record) tracker, and session history calendar using the **MERN** stack
- Leveraged **Next.js** server-side rendering to optimize for seamless user experiences, effectively eliminating the flickering effect during data updates and ensuring smooth and consistent page loads
- Utilized **Chakra UI** for a modern and visually appealing user interface, and **Formik** & **Yup** for robust form validation
- Implemented user authentication and user sessions with **Passport.js** & **Express Validator**

## SKILLS

**Languages:** Java, C/C++, JavaScript, TypeScript, Python, SQL, HTML/CSS

**Tools & Frameworks:** React, Express, Node, MongoDB, Git, Next.js, Flask, Firebase, JUnit, Bash
